PHYTO STEM CELL TECHNOLOGY

[MEDICAL BEAUTY] SKIN CARE · ALL SKIN TYPES · FOR AGES 25-45

Main ingredients of this series: Malus Domestica, Fruit Cell Culture Extract (Apple stem cells), Sea water, Regestril™, Vitamin C, Ectoin, Matrixyl®¹, Evermat®²

Stem cells are the source of all tissue and play an important role in the development and regeneration of the organism. They have the capacity to divide or reproduce indefinitely. But the capacity of stem cells deteriorates with age and under the impact of daily environmental factors. Stem cell research and specially the extraction of natural plant stem cells reveals a technology, which can be defined as a breakthrough in anti-aging skin care; it will drive all new possibilities in the Cosmetic Industry.

This newest research focuses on the protection and longer durability of skin stem cells. This is why plant stem cells and their positive effect on the skin stem cells acts as an innovative active ingredient in Stri-Pexan PHYTO STEM CELL TECHNOLOGY. This active ingredient is extracted from an aged, rare, Swiss apple.

MICRO NEEDLING

The MICRO NEEDLING revitalizes the skin's natural biological regeneration and repair mechanisms by needle stimulation and is suitable for all skin types. The needle stimulation helps penetrate the product into the skin, so it can be more easily absorbed.

The treatment contains:

AMINO · 4 ml

HYDRA FLASH MASK · 1 piece

HYALURON · 5 ml

FINISH MASK · 2,5 ml

In addition, the MICRO NEEDLING ROLLER is necessary. This is a needle roller with a needle length of 0.25 mm. NOTE! Do not apply in case of acne or couperosis.

Course of treatment: Cleanse skin thoroughly and tone with KLAPP CLEAN & ACTIVE products. Remove excess product with a Kleenex tissue to ensure the skin is dry.

Now smooth the AMINO Gel into the skin by gently patting the skin with your fingertips to stimulate the cell metabolism and to tighten the tissue structure.

Move the MICRO NEEDLING ROLLER over décolleté, neck and face, one area after the other, pressing slightly. By doing so, move in vertical, horizontal and diagonal direction during approx. 10-15 minutes according to skin sensitivity.

Remove the HYDRA FLASH MASK – a very moisturising and calming mask that stimulates cell growth – from the package and place firmly, avoiding air bubbles. Wait approx. 15 minutes while it takes effect.

Then evenly apply HYALURON – a high and low molecular hyaluronic acid with retard effect – to face, neck and décolleté and gently massage in, using the GK4 FACE PUSH-UP or a comparable device or by giving a manual massage.

At the end use the calming and balancing FINISH MASK and gently smooth into skin. In case of very sensitive skin distribute over skin and wait approx. 10 minutes while it takes effect. Gently massage the rest of the product into the skin.

Duration of treatment: 50-60 minutes
